This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

STATE OF WISCONSIN.

Report of the State Treasurer.

MADISON, WIS., Oct. 12, 1896.

To the Governor of the State of Wisconsin:

SIR: In accordance with the requirements of law, I have the honor to respectfully submit herewith the biennial report of the receipts and disbursements of this office during the fiscal years ending September 30, 1895 and 1896, exhibiting a full statement of the financial transactions of this department and including also a detailed statement of the operations of the bank department. In connection herewith I desire to call your attention to the banking laws of the State. The old law provides that the State and Private Banks shall make semi-annual reports to the State Treasurer. Since the Bank Examiner's Department was created, they are also required to make reports to the Bank Examiner, causing a great deal of annoyance and work for the banks, as well as additional expense to the State. In many respects the law is defective, and I respectfully recommend that you request the Legislature to enact a law (to be voted on by the people) revising the old law, and placing the control of banks under the supervision of the Bank Examiner investing him with the necessary and proper authority to protect depositors and the people of the State.

I am sir, very respectfully,

SEWELL A. PETERSON,

State Treasurer.

SCHOOL FUND INCOME.

The interest received on School Fund investments, on the principal due for sales of school lands and on moneys belonging to the School Fund Income on deposit in Bank Depositories and the mill tax levied under Chapter 287, laws of 1885, as amended by Chapter 39, laws of 1895, constitute the School Fund Income.

The one mill tax constituting a part of this fund is apportioned to the different counties in accordance with Chapter 39, laws of 1895. The other amounts constituting this fund which are derived from sources as above enumerated, are apportioned to the several counties in the month of June of each year as provided by section 554 of the Revised Statutes. The apportionments, which are for the use of the common schools, are made according to the number of children in each town, village and city over the age of four and under the age of twenty years, as shown by the report of the State Superintendent during the year preceding. The rate per capita for the apportionment under Chapter 39, laws of 1895, was eighty-nine cents and four mills; and under section 554, of the Revised Statutes, twenty-eight cents per capita.

The receipts and disbursements during the last two years have been as follows:
